1. In view of the Appeal Brief filed on 8-9-2007, PROSECUTION IS HEREBY REOPENED. Another Final Rejection set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 2-5, 7-10 and 12-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Telefus (5,694,304). Telefus (a first embodiment **figure 4**) discloses the claimed invention, a resonant power converter having two transformers (T1 and T2) with the two primaries (Tp1 and Tp2) coupled in series and each of the two transformers include secondary winding (Ts1 and Ts2) for supplying a non-zero current to a common load during a substantially the same time period except for having the first transformer which includes a first predetermined number of further secondary windings for supplying a first total power to associated loads. Telefus (a second embodiment **figure 2**) discloses that it is known in the art to provide the first transformer which includes a first predetermined number of further secondary windings for supplying a first total power to associated loads. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the first transformer which includes a first predetermined number of further secondary windings for supplying a first total power to associated loads of Telefus (a second embodiment **figure 2**) with a resonant power converter having two transformers (T1 and T2) with the two primaries (Tp1 and Tp2) coupled in series and each of the two transformers include secondary winding (Ts1 and Ts2) for supplying a non-zero current to a common load during a substantially the same time period of Telefus (a first embodiment **figure 4**) , in order to provide a two transformer circuit with primaries connected in series with their secondary windings connected to supply current to a common load and have another secondary winding to provide power to the associated load. The pluralities of loads can be satisfied by having a pluralities of secondary windings as shown in Telefus and the

combination of the secondary windings from two separate transformers for loads that have additional power requirement is clearly shown in figure 4.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
